LEVER CHAIN HOIST

¾ to 6 Metric ton Capacity

FEATURES

Easy One Hand Operation and Set up - When the selector is in neutral and no load is present then free chain mode is entered. The chain can be pulled through the hoist by a pull handle for easy set up and load attachment before engaging the selector for pulling. The pull handle also acts as a chain stop. Short ratchet strokes of a non-slip rubber grip lever and the 360 degree rotation requires minimal space for operation. The pull force to operate may be 20 to 30% less than others.

Operation in any orientation is assured by a fully enclosed horseshoe shape chain guard keeping the load chain in contact with the lift wheel.

Available in lifts of 5, 10 and 20 feet zinc plated chain.

Custom lifts available.
